## Read the following text and answer the questions.

### Karahnjukar Hydroelectricity plant

Karahnjukar is a hydroelectricity plant in eastern Iceland. The hydroelectric plant is the largest power plant in Iceland. It took five years to build, from 2003 to 2007. Five dams were built across two rivers. This created three large reservoirs of water. Water from the reservoirs travels through 73 kilometers of underground water tunnels. Then it goes down a deep tunnel to the underground power station. The Karahnjukar Dam is the largest of the five dams. It is 193 meters high and 730 meters long. It **generates** more than 690.000 kilowatts of power a year. The power isn't used to heat homes. It is used for an industrial metal plant.

## Read the following text and answer the questions.

I think Egypt is a great country to visit. You can visit the pyramids of Giza. The Library in Alexandria, or the beautiful Temple of Hatshepsut in the Valley of the Kings. There are so many things to see. It's a fantastic place to have a holiday. You can take a boat trip down the Nile or go camping in the desert or you can go scuba diving in the Red Sea. The spring festival of Sham El-Nessim is my favorite festival. We have picnics in the park with our families and we eat special food. We paint and decorate eggs. It's fun! My favorite Egyptian dishes are the ones we eat at festival! We eat a delicious dish called fattah at Eid Al-Adha and special cookies called kahk at Eid Al-Fiter!

## 5- Write a paragraph of (40) words using the following elements:

### The High Dam

Ideas to help you: generate - electricity.

The High Dam was finished in 1971. It uses water from the River Nile to generate electricity. The location of Aswan made this a good place to build the dam. The dam could stop the River Nile from flooding. The dam has twelve large turbines inside. It generates more than 10 billion kilowatt hours of electricity a year.

### Fossil fuels

Ideas to help you: coal - carbon dioxide.

Fossil fuels are things like coal, gas, and oil. These are burned in factories or used to make homes and buildings warm. Fossil fuels are non-renewable. When they run out, we can't find or make more of them. Fossil fuels are made from remains of very old plants and animals that lived on Earth a long time ago. When we burn them, a lot of carbon dioxide is released into the atmosphere.

### Different environment
